Drizzle	Cloudy	Light rain	Heavy rain showers	Light rain	Cloudy
Precipitation probability					
30%	20%	40%	60%	30%	20%

Forecast for Monday 11 Sep 2023

Weather: A cloudy and locally murky start on Monday, with pathcy light rain and drizzle possible from thicker cloud. Brightening up through the morning, with limited sunny intervals developing for a time, helping to spark showers in turn, some of which may turn locally heavy with a risk of thunderstorms. This risk should ease later ahead of more persistent evening rain arriving late on. Another humid and warm day but not quite as hot as recently.

Chance of cloud-free hill tops above 600m: 20% becoming 60%.

Low cloud and visibility: Periods of low cloud above 400m during the morning, lifting to 600m and turning patchier by the afternoon. Often poor or very poor visibility during the morning with hill fog. Otherwise generally good, albeit quite hazy, though locally poor in any afternoon showers.
